

Axiom Pilot Program Agreement

90-Day Cryptographic Execution Receipt Engagement

\$3,000 flat · 90 days · API key in 2 minutes

Payment confirms agreement acceptance. No separate DocuSign required. Once payment clears, your API key ships immediately.

1. Parties

This Pilot Agreement ("Agreement") is entered into as of the date of last signature ("Effective Date") between: Axiom Inc., a Delaware corporation ("Provider"), and the entity identified in the Stripe checkout record associated with this pilot ("Customer").

2. Scope of Services

Provider shall provide Customer with access to Axiom's cryptographic execution receipt infrastructure for the Customer's internal AI agent skill invocations via MCP (Model Context Protocol), for a period of ninety (90) calendar days from the Effective Date.

Services include:

- API access to Axiom receipt generation endpoint (POST /api/receipts/invoke)
- Unlimited receipt generation during the pilot period
- Access to the public receipt verification endpoint (GET /api/receipts/:id/verify)
- One (1) production AI agent skill instrumented with cryptographic receipts
- Open-source verifier (MIT license, zero dependencies) tested by Customer team
- Founder Slack and email support during business hours
- 30-minute kickoff call + day-30 midpoint check-in

Deliverables at pilot end: (i) at least one live skill producing signed execution receipts in Customer production environment; (ii) Customer compliance team independently verifying receipts using the open-source verifier.

Regulatory alignment. Axiom receipts are designed to address:

- EU AI Act Art. 12 & 13 — per-invocation audit logs and transparency artifacts
- SOC 2 CC7.2 — cryptographic receipts satisfy monitoring of system components
- HIPAA §164.312(b) — audit control standard. Raw PHI never stored; only SHA-256 hashes.

Nothing in this Agreement constitutes legal or compliance advice. Customer remains solely responsible for its own regulatory obligations.

3. Price and Payment

Item	Amount	Notes
90-Day Pilot Platform Fee	\$3,000 flat	One-time, due on payment. No recurring charges.
Post-pilot annual subscription	By negotiation	Pilot customers receive 30-day window before standard rates.

Payment confirms acceptance. Submitting payment via Stripe checkout constitutes Customer acceptance of this Agreement. No wet signature required. Provider issues API key and schedules kickoff within 2 minutes of payment clearing.

Refund policy: Pro-rated refund for unused days if Provider terminates before day 75. No refund if Customer terminates after day 15.

4. Success Criteria

By the end of the 90-day pilot, Customer will have demonstrated:

#	Criterion	Description
A	Live receipt in production	At least one production AI agent skill is instrumented and generating signed receipts.
B	Verifier tested independently	Customer's compliance team verified receipts without Provider assistance.
C	Day-30 check-in completed	Customer participated in the midpoint feedback session.

Meeting these criteria constitutes successful pilot completion. Failure to meet criteria due to technical blockers attributable to Provider will extend the pilot period by mutual written agreement.

5. Customer Commitments

In exchange for pilot access, Customer agrees to:

- Case study participation: Provide logo, company name, and 2–3 quotes (redactable). Provider may use in marketing pending written approval.
- Reference call: Participate in up to one (1) reference call with a prospective Axiom customer within 60 days of pilot end.
- Feedback sessions: Attend structured feedback sessions at day 30, day 60, and day 90.

6. Data Handling and Intellectual Property

generation.
